CHAPTER 1 INTRODUCTION

1.1 Motivation

1.2 Goals

1.3 Benefits

1.4 Thesis Organization

The rest of this thesis is organized as follows:

- **Chapter 2** Review of particles in video games and the ChilliSource game engine
- **Chapter 3** Overview of the instrumentation done and the optimizations made
- **Chapter 4** Presentation of the results before and after optimizations were made
- **Chapter 5** Discussion of results, conclusions, and future directions

CHAPTER 2 BACKGROUND

This can be a hard section to write because it will force you to learn about the field that your research is a part of. It's also a really good place to start on your thesis because the stuff you learn here will likely drive the rest of your research.

2.1 Particles in Video Games

2.2 The ChilliSource Game Engine

CHAPTER 3 METHODS

The methods described below are roughly organized in the order they were performed during the case studies. Some methods are independent of the rest, so these methods are arranged at the end.

3.1 Methods Syntax And Conventions

Some of the special syntax conventions used in this document are as follows.

- *Scientific Names* - capitalized and italicized.
- **Scripts** - bold and Courier font.
- *Variables* - italicized
- **Functions** - bold
- *System Commands* - italicized and underlined

3.2 Instrumentation

3.2.1 Metrics

3.2.2 Timing

3.3 Optimizations

CHAPTER 4 RESULTS

These results prove ...

4.1 Before Optimization

4.2 After Optimizations

CHAPTER 5 DISCUSSION

It would be a good idea to refer to every figure or table presented in chapter 4 as you discuss what it all means.

5.1 Conclusions

It is clear from the analysis of the experimental data that ...

5.2 Future Directions

Certainly a valid avenue of future research would be ...
